Imaginal Awakening: A Sacred Journey into Future Consciousness.

Nestled within a secluded, private and luxurious sanctuary just 40 minutes from Cancun, Metamorfosis is a bespoke five-day, six-night ceremonial experience designed for those called to visionary transformation.

If you've felt the whisper that something more is calling... *this* is your invitation. Prepare to experience profound shifts in clarity, vitality, and individual purpose. To open into new realms of possibility – and step fully into the future you are meant to embody.

*Not simply a retreat, **Metamorfosis** is a visionary imagining for those ready for deep personal evolution and who are feeling a call to action.*

“Leadership education now manufactures
Well-dressed technicians—
People trained to optimize systems
They neither understand,
Nor dare to question.
They call for “resilience”
Without understanding trauma.
They demand “innovation”
Without understanding creativity.
They sell “purpose”
Without understanding meaning”.

METAMORFOSIS

It's Time We All Play Bigger

We know the world is changing really fast. Therefore, so must the way we navigate it—individually and collectively. **Nancy is focused on helping us confidently answer these questions:**

***What does the future need + expect from you?
What are you in a unique position to create + contribute to it? And how can our unique passions and expanding consciousness help shape a future of shared prosperity?***

This retreat invites you into inspiring dialogues and strategically guided foresight practices that consider what it means to let go of outdated expectations and beliefs, and step into what it means to truly play bigger. Together, we will explore new pathways to repattern the **quantum future**, shaping what comes next with both vision and heart.

Joining a global emergence of imaginal cells, **we step into our role as active co-creators of a more awakened world.**

METAMORFOSS

Imaginal Cells

First theorized in the 1600s, nature's innate intelligence reveals a paradox, both resisting and driving its own metamorphosis.

In the embryonic stage of a caterpillar larva exist cells designed for butterfly life, such as antenna and wings. Lying dormant and isolated most of the caterpillar's journey, these cells exponentially increase in number and begin to cluster when it's time for the insect to begin its transformation.

The consumptive caterpillar however, has no idea this beautiful fate awaits and tries futilely to resist the inevitable shift. We are witnessing this same phenomenon in our world today.

Visionaries and change-makers—our own imaginal cells—carry the blueprint for a more expansive, regenerative future. As our transformative forces Awaken, multiply and gather, so too will the inevitability of profound and necessary positive change.
